

# Products & Services for Purchasing-Selling Entities

As the Power industry grows, the opportunities for PSE's expand. With the expansion of deregulation, the power markets are growing exponentially. This growth is rapidly attracting new people to the field, creating competition amongst PSE's.

In order to gain the extra edge needed in the Power Markets industry, SOS Intl offers PSE's a specific curriculum designed to familiarize them with Power Industry basics and provide a base knowledge that can be valuable when communicating with clientele.
